

Master of Science in Computer Science graduate with a Bachelor's degree in Artificial Intelligence and Machine Learning. Hands-on experience designing cloud-native applications, data engineering pipelines, and machine learning solutions. Proficient in AWS (Lambda, API Gateway, DynamoDB, Amazon S3, CloudFront), Google Cloud Platform (BigQuery, Cloud Storage, BigQuery ML), Python, SQL, and Java. Experienced in building scalable REST APIs, serverless applications, and data-driven solutions through academic, internship, and personal projects. Actively seeking full-time opportunities in Software Engineering, Data Engineering, Cloud Engineering, or Machine Learning Engineering.

EDUCATION

Florida Atlantic University	Aug 2024 – May 2026
Master of Science in Computer Science.	3.71 GPA
Rajarajeswari College of Engineering	Dec 2020 – July 2024
Bachelor of Engineering in Artificial Intelligence & Machine Learning	8.71 CGPA

TECHNICAL SKILLS

Languages	Python, Java, SQL
Cloud Platforms	Amazon Web Services : Lambda, API Gateway, DynamoDB, Amazon S3, CloudFront. Google Cloud Platform : BigQuery, Cloud Storage, Compute Engine, BigQuery ML.
Data Engineering	ETL Pipelines, Data Warehousing, Data Lakes, BigQuery, SQL, Data Modeling.
Machine Learning	Scikit-learn, TensorFlow, Keras, OpenCV, Pandas, NumPy.
Web Technologies	HTML, CSS, JavaScript, jQuery.
Developer Tools	Git, GitHub, VS Code, Jupyter Notebook, Postman.
Frameworks & Libraries	Streamlit, Boto3.

WORK EXPERIENCE

Varcons Technologies Pvt Ltd | *Machine Learning Intern* | Bengaluru, India | Aug 2023 – Sept 2023

- Developed a machine learning application using Python and Streamlit to predict chronic disease risks based on user-provided health parameters.
- Performed data preprocessing, feature engineering, and exploratory data analysis to improve data quality and model performance.
- Trained and evaluated multiple machine learning classification models using Scikit-learn, Pandas, and NumPy.
- Built an end-to-end prediction pipeline from data preparation to real-time disease risk prediction through an interactive Streamlit interface.

Sookshmas E-Learning Pvt. Ltd | *Full Stack Web Developer Intern* | Bengaluru, India | May 2022 – Nov 2022

- Developed and maintained full-stack web applications using Java, MySQL, HTML, CSS, JavaScript, and jQuery.
- Built responsive user interfaces and integrated backend services to support dynamic web functionality.
- Implemented database operations, debugging, and application testing to improve application reliability and performance.

ICT Academy | *Training & Development Intern* | Bengaluru, India | Aug 2023 – Dec 2023

- Completed a 420-hour technical training and internship program covering software development fundamentals.
- Built applications using C#, .NET Framework, HTML, CSS, JavaScript, and SQL.
- Gained practical experience in frontend development, database management, and object-oriented programming.

PROJECTS

AWS Serverless To-Do Application - *Python, AWS Lambda, API Gateway, DynamoDB, Amazon S3, CloudFront*

- Designed and deployed a fully serverless CRUD web application using AWS Lambda, API Gateway, DynamoDB, Amazon S3, and CloudFront.
- Developed four AWS Lambda functions in Python to implement RESTful APIs for creating, retrieving, updating, and deleting tasks.
- Built a responsive frontend using HTML, CSS, and JavaScript and integrated it with backend APIs.
- Hosted the application on Amazon S3 and distributed it globally using CloudFront with DynamoDB as the backend database.

E-commerce Data Engineering Pipeline - *Google Cloud Platform (GCP), BigQuery, Cloud Storage, SQL, Python, ETL*

- Designed an end-to-end ETL pipeline on Google Cloud using Cloud Storage and BigQuery to process e-commerce sales data.
- Ingested and transformed customer and transaction datasets using SQL to generate customer-level analytical insights.
- Computed business metrics including total baskets, total items purchased, and average items per basket.

- Exported transformed datasets from BigQuery to Cloud Storage in Parquet format for efficient analytics.

Machine Learning Application for Chronic Disease Prediction - *Python, Streamlit, Scikit-learn, Pandas, NumPy*

- Developed an interactive chronic disease prediction application using Python and Streamlit.
- Performed data preprocessing, feature engineering, and exploratory data analysis to improve model performance.
- Trained and evaluated multiple machine learning classification models using Scikit-learn.
- Built an end-to-end prediction pipeline from data preparation to real-time disease risk prediction.

Morphological Matching for Similar Image Detection - *Python, OpenCV, VGG16, Computer Vision*

- Developed an image similarity system using OpenCV and a pre-trained VGG16 model.
- Extracted deep image features to identify visually similar images.
- Built an interactive interface for image comparison and similarity retrieval.

Workout Discord Bot - *Python, Discord.py*

- Developed a Discord bot using Python to recommend personalized workout routines.
- Automated user interactions through modular command-based architecture.
